

inches

1. Around the head

Measure all around the head starting from the front hairline, following under the tips of the ears and back under the base of the skull (which is usually 2.5 cm or 1" above the nape of the hairline).

2. Forehead to nape of neck

Measure the hairline at the center of the forehead (roughly 2 4/5" or 7 cm from the eyebrows) straight back over the crown to the center of the hairline at the nape.

3. Ear to ear across forehead

Measure from the hairline at the top front of the ears (behind the sideburns where the hair starts to grow - usually 1 cm or 2/3" up and forward from the ear), across the hairline on the forehead and back to the same position on the other side.

4. Ear to ear over the forehead

Measure from the hairline where the hair starts above the ear (usually 1 cm or 2/3" up from the ear) across the crown of the head extending to the hairline on the opposite side.

5. Temple to temple around the back

Measure from the hairline at the back of the temple back horizontally across the peak of the back of the skull.

6. To nape

Measure the width of the nape hairline.

7. Behind ear under occipital bone
